PROFESSIONAL SUMMARY

18-year-old, self-taught web and front-end developer who designs, builds, and ships fast, animated, high-converting websites and web applications end to end. A fast learner who teaches himself whatever a build needs. Fluent in HTML, CSS, JavaScript, and Tailwind, with a strong eye for responsive layout, interactive motion, and pixel-accurate design-to-code. An advanced prompt engineer who builds with AI daily to move from idea to shipped product faster. Founder of a media and software studio who has shipped a live multi-tenant SaaS and native apps across platforms. Local to the DC metro and available for onsite work in Bethesda, MD.

TECHNICAL SKILLS

- **Front-End:** HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, responsive and mobile-first design, accessibility, cross-browser development
- **AI & Prompt Engineering:** Advanced prompt engineering, AI-assisted development, and integrating large language models such as the Claude API into products
- **Web & 3D:** Framer, Wix Headless, component and design systems, Figma-to-code, animation and micro-interactions, Three.js and WebGL
- **Apps & CI:** Native SwiftUI apps (iPhone, iPad, Mac), Android and desktop builds, shipped through GitHub Actions
- **Backend & Cloud:** Cloudflare Pages, Workers, and KV, Supabase and PostgreSQL with row-level security, live Stripe subscription billing, REST APIs, DNS and SSL, deploys
- **Practices:** SEO, Core Web Vitals and performance, version control, technical documentation, and third-party API integration

PROFESSIONAL EXPERIENCE

Founder & Lead Web Developer

2024 to Present

Kidus Digital Group • Silver Spring, MD

- Design and build animated, high-converting marketing websites and web apps for clients from concept to launch, using HTML, CSS, JavaScript, Tailwind, and visual web builders.
- Ship responsive, cross-device interfaces with custom motion and interactive elements, including canvas, WebGL, and scroll and cursor-driven animation.
- Build complete products end to end: front end, backend (Cloudflare Workers, Supabase and PostgreSQL), payments (live Stripe), native apps, and CMS-driven content.
- Run a super-admin control plane across a multi-tenant SaaS, with feature flags, error monitoring, loyalty, and affiliates, and ship native apps via GitHub Actions.
- Integrate AI assistants and third-party APIs into products, and maintain clear documentation and version control across projects.

SELECTED PROJECTS

- **KTeC design (ktec.design):** Multi-tenant SaaS with a live 3D product customizer (Three.js), 100 per-client storefront styles, owner dashboards, live Stripe subscription billing, and a super-admin control plane. Built the front end, Cloudflare Workers backend, Supabase database, billing, and native apps for iPhone, iPad, Mac, Android, and desktop.
- **BookHere (bookhere.site):** Booking platform for small businesses with a live calendar, Google and email sign-in, owner approval, and an instant self-serve door. Ships as native apps for iPhone, iPad, Mac, and Android.
- **Kidus Digital Group (kidusdigitalgroup.com):** Media and software company site with an interactive, cursor-reactive portfolio and an embedded AI assistant, deployed on Cloudflare.
- **Client Websites:** Custom, animated, responsive websites and brand work for real clients and businesses, including Mussie, Grace Church, Light Of Tomorrow, and A4 Studio.

EDUCATION

Self-directed study in web development and software engineering, with continuous, hands-on learning across the full stack.
